Summary

Computer Engineering graduate (CGPA 7.8) with hands-on experience building secure, scalable **RESTful APIs** using **Spring Boot**, **Hibernate (JPA)**, and **MySQL**. Skilled in **JWT-based authentication**, **role-based access control**, and **MVC layered architecture**. Independently developed multiple backend projects including a **blogging platform API** and a **shopping cart application** — demonstrating strong understanding of real-world backend design. Eager to contribute clean, maintainable code in a professional **Java development** environment

Skills

Languages: Java, SQL

Backend: Spring Boot, Spring Security, Hibernate (JPA), JDBC, Servlets, JSP, RESTful APIs

Web: HTML5, CSS3

Database: MySQL

Concepts: OOP, MVC Architecture, JWT Authentication, RBAC, Exception Handling, Pagination & Sorting, Arrays & Strings (DSA)

Tools: Git & GitHub, Maven, Postman, Eclipse IDE

Projects

Blogging Platform – Secure Backend API

🔗 [GitHub Link](#)

Spring Boot, Spring Security, JWT, Hibernate(JPA)

- Developed production-grade **RESTful APIs** using **Spring Boot** following **Controller–Service–Repository architecture**, ensuring clean and scalable design.
- Implemented secure authentication using **Spring Security** with **JWT** and enforced **role-based access control (RBAC)** across all endpoints.
- Designed a normalized **MySQL** database schema with core entities (User, Post, Category, Comment) and implemented **pagination and sorting** for efficient data handling.
- Integrated **global exception handling** with meaningful **HTTP responses** and validated APIs using **Postman** for reliable performance.

Shopping Cart Web Application

🔗 [GitHub Link](#)

Java, Servlet, JSP, JDBC, MySQL, HTML, CSS

- Developed a full-stack shopping cart application using **MVC architecture** with **Servlets** and **JSP**.
- Implemented user **authentication**, **product catalog**, **cart management**, and **order processing** with a payment workflow.
- Managed secure sessions using **HttpSession** for **session tracking** and access control.
- Designed a normalized **MySQL** schema and used **JDBC with prepared statements** for secure data operations and **SQL injection prevention**.

Experience

Application Development Intern

June 2025 – Dec 2025

NexaNova ProTech, Pune

- Assisted in the development of **software applications** based on **client requirements** in a team environment.
- Contributed to the design and implementation of **new features**, gaining exposure to **real-world application workflows**.
- Conducted **research and analysis** on **emerging technologies** to support project development needs.
- Supported **debugging, maintenance, and issue resolution** to ensure smooth functioning of applications.

Education

B.E. Computer Engineering

Graduated: 2025

Sandip institute of Engineering and Management, Nashik

CGPA: 7.8 / 10
